

GJH-INC.COM — AI-Powered Website Platform

Product Requirements for Replit Agent 4

Domain: gjh-inc.com

Company: GJH INC — Strategic consulting, technology services, and managed services for government, commercial, and non-profit organizations

Deployment: Cloudflare (DNS, CDN, edge, SSL) + Replit (app hosting, database, auth)

Repository: GitHub — GJH_platform

1. PROJECT OVERVIEW

Build an AI-powered business development platform that replaces the current static HTML brochure site. The platform uses five specialized AI agents that work together to generate content, engage prospects, nurture leads, sell productized services, and optimize performance — all autonomously with human-in-the-loop approval.

This is not a website redesign. It is a revenue-generation system deployed on a domain.

Core Architecture

- **Frontend:** React/Next.js with Tailwind CSS, server-side rendered for SEO
 - **Backend:** Node.js API layer on Replit
 - **Database:** Replit Database (or PostgreSQL) for leads, content, products, analytics, agent events
 - **AI Layer:** Anthropic Claude API for content generation, chatbot, and lead analysis
 - **Email:** SendGrid or Resend for transactional + nurture emails
 - **Payments:** Stripe for product purchases
 - **Analytics:** Plausible or PostHog (privacy-friendly, no cookie banner)
 - **Scheduling:** Cal.com or Calendly embed
 - **Auth:** Replit Auth for admin dashboard
-

2. FIVE AI AGENTS

Agent 1: Content Strategist

Purpose: Automate the content engine — monitor GovCon/cyber/data/AI verticals, generate SEO-optimized blog drafts for human review.

Functions:

- Scan RSS feeds and government news sources (SAM.gov, FedBizOpps, GSA announcements) for trending topics
- Generate blog post drafts with heading hierarchy, internal links, keyword targeting
- Auto-generate SEO metadata: title tags, meta descriptions, Open Graph, Schema.org structured data
- Create LinkedIn-ready social snippets for each published article
- Maintain editorial calendar with seasonality-based publish dates
- Admin dashboard: draft queue with approve/edit/reject/schedule workflow

Content Pillars:

- Government Contracting (RFP strategies, SAM.gov, SBIR/STTR, compliance)
- GSA Schedules (applications, pricing, renewals)
- Cybersecurity & Compliance (NIST 800-171, CMMC, FedRAMP)
- AI & GenAI Solutions (federal use cases, ROI, responsible AI)
- Data & Analytics (modernization, Databricks/Snowflake, dashboards)
- Web Development (AI-optimized design, Section 508, performance)

Agent 2: Prospect Engager (Intelligent Chatbot)

Purpose: AI chat widget on every page that answers questions, walks prospects through capabilities, qualifies leads, and captures contact info 24/7.

Functions:

- Contextual chat widget aware of which page visitor is viewing
- Knowledge base: GJH services, NAICS codes, certifications, past performance, capability statement
- Lead qualification flow: visitor role (CO, PM, CTO), org type, budget range, timeline
- Contact capture: name, email, organization → stored as lead record

- Escalation: email notification to human when prospect is high-value or question exceeds knowledge base
- Conversation logs with analytics: common questions, drop-off points, conversion rates

Agent 3: Lead Nurture & CRM Bridge

Purpose: Automate follow-up sequences for captured leads — emails, capability statement delivery, meeting scheduling.

Functions:

- Email sequences triggered by lead tier (hot/warm/cold)
- Personalized follow-ups based on pages viewed and chatbot conversation topics
- Automatic capability statement PDF delivery
- Meeting scheduling integration (Cal.com/Calendly)
- Apollo integration for prospect enrichment and outbound
- Pipeline dashboard: Kanban-style lead status, conversion metrics, follow-up reminders

- Newsletter: automated bi-weekly digest of published blog content

Agent 4: SEO & Performance Monitor

Purpose: Continuous site health auditing, ranking tracking, and optimization recommendations.

Functions:

- Broken link detection and alerting
- Core Web Vitals monitoring (LCP, INP, CLS) — target 90+ PageSpeed
- Keyword ranking tracker across all content pillars
- Competitor monitoring: gjhconsulting.net indexed pages, new content, ranking changes
- Automated XML sitemap regeneration
- Schema.org structured data validation
- Weekly performance report to admin dashboard

Agent 5: Product & Service Showcase Engine

Purpose: Digital storefront for productized offerings with payment processing and

proposal generation.

Products to list:

Product	Description	Delivery	Price Model
CMMC Readiness Assessment	Gap analysis against CMMC L1/L2 with remediation roadmap	PDF + consultation	Fixed fee
AI Readiness Audit	Evaluate org readiness for AI adoption (data, infra, talent)	PDF + presentation	Fixed fee
Data Maturity Assessment	Score data governance, quality, architecture, analytics	Scorecard + roadmap	Fixed fee
GovCon Bid Strategy Package	RFP response strategy, win themes, compliance matrix template	Document package	Fixed fee
Website AI Optimization Audit	AI search readiness, SEO, conversion optimization	PDF + action plan	Fixed fee

Functions:

- Product catalog with individual landing pages per offering
 - Inquiry form per product with qualification and routing
 - Stripe integration for direct purchase
 - Proposal template auto-generation (pre-fill client name, service, scope, pricing)
 - Dynamic case studies linked to relevant products
 - Order tracking and fulfillment status
-

3. SITE ARCHITECTURE

Pages Required

Route	Page	Key Elements
/	Home	Hero (value prop + primary CTA + secondary CTA), service highlights (6

Route	Page	Key Elements
		cards), social proof, newsletter signup, chatbot widget, short contact form
/about	About	Mission statement, team bios, certifications (badge-style), partnerships (6-8 logos max), company video placeholder
/services	Services Overview	Links to all 5 service landing pages
/services/government-contracting	Government Contracting	Dedicated page with benefits, process, CTA
/services/web-development	Web Development	Dedicated page (migrate from current webdevelopment.html)
/services/data-services	Data Services	NEW — currently links to #

Route	Page	Key Elements
<code>/services/automation</code>	Automation & Integration	NEW — currently links to #
<code>/services/genai</code>	GenAI Solutions	Dedicated page (migrate from current genai.html)
<code>/products</code>	Product Catalog	Grid of productized offerings with pricing
<code>/products/[slug]</code>	Product Detail	Individual product page with purchase/inquiry flow
<code>/insights</code>	Blog / Insights	All articles, filterable by topic tag, search, pagination
<code>/insights/[slug]</code>	Blog Post	Individual article with author, date, related posts, newsletter CTA
<code>/case-studies</code>	Case Studies	3-5 project showcases

Route	Page	Key Elements
/case-studies/[slug]	Case Study Detail	Problem, solution, measurable outcomes
/capability-statement	Capability Statement	Interactive web version + downloadable PDF
/contact	Contact	Form, phone, email, map, calendar scheduling link
/careers	Careers	Open positions (migrate from current)
/privacy	Privacy Policy	Updated policy
/terms	Terms of Service	Updated terms
/admin	Admin Dashboard	Protected — content, leads, SEO, products, agent activity

Design Requirements

- **Fonts:** Maximum 2 families (Inter or similar + monospace for code/technical)
- **Colors:** Brand indigo ( #4338CA), dark navy ( #1E1B4B), neutral grays — max 3 accent colors
- **Hero:** One clear value proposition + one primary CTA ("Request a Proposal") + one secondary CTA ("Download Capability Statement")
- **Icons:** Professional SVGs, no emoji
- **Layout:** Generous white space, glassmorphism effects (frosted glass cards from current design)
- **Partners:** Maximum 6-8 logos as clean badge grid (no scrolling carousel)
- **Mobile-first:** Responsive design — government procurement officers browse on mobile
- **Accessibility:** Section 508 compliant throughout
- **Performance:** Target 90+ PageSpeed Insights on mobile and desktop

Footer Structure (model after gjhconsulting.net)

- Column 1 — Company: Home, About, Services, Case Studies, Careers

- Column 2 — Topics: Government Contracting, AI Solutions, Data Services, Cybersecurity
 - Column 3 — Newsletter signup + social links
 - Bottom bar: Privacy Policy, Terms of Service, Copyright
-

4. ADMIN DASHBOARD (`/admin`)

Protected by Replit Auth. Single unified view across all agents.

Sections:

1. **Overview:** Key metrics dashboard (leads this week, articles published, PageSpeed score, revenue, active chatbot conversations)
2. **Content Manager:** Draft queue with approve/edit/reject/schedule. Editorial calendar view. Published content analytics.
3. **Lead Pipeline:** Kanban board (New → Contacted → Qualified → Proposal → Won/Lost). Lead detail cards with conversation history and page view data.

- 4. **SEO Health:** Broken link report. Keyword ranking trends. Core Web Vitals chart. Competitor comparison.
 - 5. **Products & Orders:** Product catalog editor. Order list with status. Revenue metrics.
 - 6. **Chatbot Config:** Knowledge base editor. Conversation review. FAQ analytics (most common questions).
 - 7. **Agent Activity Log:** Real-time feed of all agent actions across the system.
-

5. INTEGRATIONS

Service	Purpose	Priority
Anthropic Claude API	Content generation, chatbot intelligence, lead analysis	Critical
Stripe	Product payments	High
SendGrid/Resend	Transactional + nurture emails	High

Service	Purpose	Priority
Cal.com/Calendly	Meeting scheduling	High
Apollo	Prospect enrichment, outbound sequences	Medium
Plausible/PostHog	Privacy-friendly analytics	Medium
GitHub	Source control sync (GJH_platform repo)	Medium
Google Search Console	SEO monitoring data feed	Medium
Cloudflare API	Edge cache purge, analytics	Low

6. AGENT COMMUNICATION

All agents share a central event bus and Replit Database.

Key Events:

- `lead_captured` → Agent 2 emits → Agent 3 subscribes (triggers email

sequence)

- `content_brief_needed` → Agent 4 emits → Agent 1 subscribes (generates draft)
 - `content_published` → Agent 1 emits → Agent 4 subscribes (updates sitemap) + Agent 3 subscribes (newsletter queue)
 - `product_inquiry` → Agent 5 emits → Agent 3 subscribes (follow-up sequence)
 - `high_value_lead` → Agent 2 emits → Email notification to admin
 - `seo_alert` → Agent 4 emits → Admin dashboard notification
-

7. IMPLEMENTATION WAVES

Wave 1 (Weeks 1-3): Foundation

- Complete site rebuild with all pages from Section 3
- Deploy chatbot (Agent 2) with GJH knowledge base
- Admin dashboard with auth

- Database schema for leads, content, products, analytics
- Cloudflare DNS + SSL + caching configuration
- SEO Monitor (Agent 4) baseline audit
- GitHub sync

Wave 2 (Weeks 3-5): Content & Revenue

- Activate Content Strategist (Agent 1) with 4-6 seed articles
- Blog/insights section with topic tags and search
- Product Showcase (Agent 5) with catalog and Stripe
- Case studies page (3 initial)
- Newsletter signup across all pages

Wave 3 (Weeks 5-8): Automation & Scale

- Lead Nurture (Agent 3) with email sequences + Apollo
- Full agent event bus
- Automated newsletter digest
- Proposal auto-generation

- Competitor monitoring → content brief pipeline
 - Performance tuning from first 30 days of data
-

8. SUCCESS METRICS

Metric	30-Day Target	90-Day Target
Indexed Pages	25+ (from ~8)	50+
Blog Posts Published	6 seed articles	18+
Chatbot Conversations	50+	200+ (15%+ lead capture)
Leads Captured	10+ qualified	40+ with nurture active
Product Inquiries	5+ page views	3+ purchases/consultations
PageSpeed Score	90+ (mobile + desktop)	95+ sustained
Newsletter Subscribers	25+	100+

9. BRAND IDENTITY

- **Company Name:** GJH INC (also known as GJH Consulting and Services)
 - **Primary Color:**  #4338CA (indigo)
 - **Dark Color:**  #1E1B4B (navy)
 - **Domain:** gjh-inc.com
 - **Location:** Vallejo, California, United States
 - **Contact Email:** info@gjh-inc.com (update from gjhconsulting.net references in current terms page)
 - **Tagline Direction:** "Strategic Consulting. Technology Solutions. AI-Powered Results."
 - **Logo:** Use existing GJH-icon.png and GJH-final.png from assets
-

10. CRITICAL FIXES FROM CURRENT SITE

These issues must be resolved in the rebuild:

1. ~~Broken service page links (Data Services, Automation link to # or /services)~~ → Dedicated landing pages
2. ~~Missing About page~~ → Full About with mission, team, certs
3. ~~No blog/content hub~~ → AI-powered insights section
4. ~~No lead capture beyond "Call Now"~~ → Chatbot + forms + newsletter
5. ~~No case studies~~ → Dedicated case studies section
6. ~~Too many partner logos in scrolling carousel~~ → Clean 6-8 badge grid
7. ~~Emoji-heavy design~~ → Professional SVG icons
8. ~~Terms page references info@gjhconsulting.net~~ → Update to info@gjh-inc.com
9. ~~No Schema.org structured data~~ → Auto-generated by Agent 4
10. ~~Generic title tags~~ → Keyword-optimized by Agent 1
